

BUILDING A ROBOCALL LAWSUIT

1 PUT YOUR NUMBER ON THE NATIONAL DO NOT CALL REGISTRY

- <https://www.donotcall.gov/>
- If possible, register with your state's do not call registry as well.

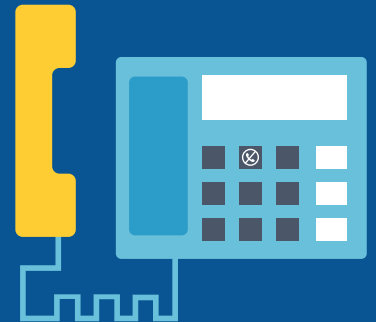

2 TELL EVERY TELEMARKETER YOU SPEAK WITH TO STOP CALLING YOU

- Ask a representative to place you on the company's do not call registry (every company that uses automated dialing technology is required to keep an internal do not call list).
- Attempt to collect and record information, including the name of the company responsible for the call, its contact information and the name of the representative you're speaking with.

3 SELECT THE OPTION TO END ROBOCALLS

- If you hear a prerecorded voice message, most telemarketers are required to include an option for you to revoke your consent to receive further robocalls.

4 TAKE NOTES ON EVERYTHING

- Keep a list of every robocall or robotext you receive: number, date and time.
- Take notes on the robocalls you receive: what was said.
- Note whether the robocall included a prerecorded voice message or if you noticed any signs of an autodialer system.
- Don't delete your caller ID history.

5 CONTACT AN EXPERIENCED ATTORNEY
